SUMMARY

Master of Business Analytics graduate (Macquarie University, 2025), promoted to Store Manager at Lovisa within 15 months while completing the degree. Experience running store performance reporting, stakeholder communication, and operational delivery. Commerce background with strong cost accounting results. Proficient in Excel, Power BI, SQL, Python, Qlik Sense, and Tableau.

WORK EXPERIENCE

Lovisa

Store Manager (Sales Analysis & KPI Reporting)

Hornsby, NSW · Jan 2026 - May 2026

- Ranked in the top 70–80 out of 400+ stores globally across APAC, UAE, Americas, and Europe over two months in a company-wide KPI competition, achieved through running post-shift debriefs with 5+ staff and setting clear daily sales and operational priorities for the team.
- Conducted weekly sales and KPI analysis against company benchmarks; identified an ATV drop from \$27.3 to \$25.7 in month one, recovered to \$29.5 within two months, and drove a 120% increase in a key sales KPI.
- Delivered daily, weekly, and ad-hoc performance reports to area management, using POS and sales data to track KPI performance, flag sales issues, and report progress against store targets.

Senior Team Member

Hornsby, NSW · Jun 2025 - Dec 2025

- Regularly assumed full store manager responsibilities during manager absences, supervising staff, managing opening and closing procedures, handling cash, and serving as the primary point of contact for operational and customer issues.
- Evaluated product demand and sell-through trends ahead of the Christmas trading period to inform stock replenishment decisions, ensuring shelves remained well-stocked during peak trading weeks.
- Took on additional operational responsibilities beyond the standard Senior Team Member role, leading to a promotion to Store Manager within six months.

Green the Chain

Marketing & Business Development Intern

Sydney, NSW · Aug 2025 - Nov 2025

- Built and rolled out a client-facing data collection tool in Google Sheets using VBA macros, dynamic dropdowns, and automated validation, scoping requirements with stakeholders and coordinating testing, feedback, and updates throughout the project.
- Wrote process and training documentation with screenshots so the team could continue using the tool after the project ended.
- Supported the marketing team in researching and compiling SEO keywords for social media content, and identified keywords to inform cold email templates introducing Green the Chain to prospective companies.
- Managed communication between the internal team and CEO throughout the project, tracked open actions, resolved issues during rollout, and completed the final documentation and handover.

McDonald's

Crew Member

Waitara, NSW · Jun 2024 - Jan 2025

- Maintained compliance with operational and hygiene standards in a fast-paced team setting, contributing to smooth service delivery across shifts.

PROJECTS

Student Outcomes Analysis - Capstone Project

- As part of a group capstone, analysed two real Macquarie University datasets, 284,818 enrolment records and 52,434 retention records, to identify student retention risk factors across faculties, cohorts, and academic performance indicators.
- Built the executive dashboard in Qlik Sense tracking retention, completion, and academic performance across faculties, and contributed to analysis supporting an XGBoost model that captured 66% of projected attrition by targeting the top 20% highest-risk students. Achieved a Distinction. Qlik Sense was self-taught during the project.

Consumer Segmentation & Market Analysis

- Applied Python (K-means++ and agglomerative clustering) to segment 2,000 gym members across demographic and socioeconomic variables, identifying three distinct customer profiles, Youthful Economically-Conscious Individuals, Wealthy Metropolitan Executives, and Knowledgeable Suburban Adults, with results validated across both methods.
- Translated cluster findings into segment-specific recommendations, including low-cost digital memberships for early-career members, premium wellness programmes for high-income executives, and family and corporate packages for suburban mid-career adults.

Relational Database Design

- Designed a nine-entity relational database for a Paris Olympics logistics scenario, mapping many-to-many and one-to-many relationships, defining composite primary keys and foreign keys, and writing SQL queries to retrieve and validate data across hotel, team, sport, and equipment tables.

EXTRACURRICULAR

Women Entering Business (WEB), Macquarie University	Feb 2025 - Jul 2025
<i>Events Director</i>	
• Managed end-to-end coordination of 3–4 professional campus events, developing project plans, managing timelines and budget trackers, liaising with corporate sponsors including Macquarie Group, and ensuring all event requirements were completed before deadlines. • Served as the primary point of contact for panel guests, speakers, and stakeholders across all events, coordinating logistics, tracking actions, and managing multiple concurrent projects, reflected in consistently positive post-event survey feedback.	

Climate Action Week Sydney	Feb 2025 - Apr 2025
<i>Event Management Volunteer</i>	
• Solely managed the end-to-end publishing of 200+ event listings on Humanitix within required timeframes, proactively identifying and resolving data errors to maintain accuracy across a city-wide Sydney event, reducing administrative workload on the core team. • Recognised by senior staff for helping resolve issues quickly and supporting event coordination across multiple Sydney locations.	

SKILLS & COMPETENCIES

• Core Competencies: Business Reporting, Performance Reporting, KPI Tracking, Stakeholder Communication, Client-Facing Delivery, Data Storytelling, Data Cleaning & Preparation, Ad-hoc Reporting, Cross-functional Collaboration, Customer Segmentation, Data Visualisation, Project Planning & Coordination, Process Improvement • Analytics & Visualisation: Excel, Power BI, SQL, Tableau, Qlik Sense, Python, R • Technical Tools: Advanced Excel (Pivot Tables, VLOOKUPS, Macros, VBA), Microsoft Office Suite (Word, PowerPoint, Outlook), Google Sheets, Jupyter Notebook, VSCode, Notion, Git, RStudio, Canva
