SUMMARY

Business Analytics graduate (Macquarie University, 2025) who progressed to Store Manager within 15 months of joining Lovisa, while completing a postgrad degree. Practical experience in operational reporting, process documentation, stakeholder communication, and project coordination across retail operations and a marketing and business development internship. Proficient in SQL, Python, Power BI, and Excel. Targeting analytical, operations, or marketing roles where data and process work intersect.

WORK EXPERIENCE

Lovisa

Store Manager

Hornsby, NSW · Jan 2026 - May 2026

- Ranked in the top 70–80 out of 400+ stores globally across APAC, UAE, Americas, and Europe over two months in a company-wide KPI competition, achieved through coordinating post-shift performance reviews with 5+ staff and translating operational priorities into clear team actions.
- Conducted weekly sales analysis against company benchmarks; identified an ATV drop from \$27.3 to \$25.7 in month one, recovered to \$29.5 within two months, and drove a 120% increase in a key sales KPI.
- Designed and delivered daily, weekly, and ad-hoc performance reports to area management, customising POS and sales data to identify performance gaps, monitor KPI progress, support budget attainment, and communicate findings clearly to non-technical stakeholders.

Senior Team Member

Hornsby, NSW · Jun 2025 - Dec 2025

- Regularly assumed full store manager responsibilities during manager absences, supervising staff, managing opening and closing procedures, handling cash, and serving as the primary point of contact for operational and customer issues.
- Evaluated product demand and sell-through trends ahead of the Christmas trading period to inform stock replenishment decisions, ensuring shelves remained well-stocked during peak trading weeks.
- Consistently stepped up beyond the Senior Team Member remit, leading to a formal promotion to Store Manager within six months.

Green the Chain

Marketing & Business Development Intern

Sydney, NSW (Hybrid) · Aug 2025 - Nov 2025

- Led the end-to-end build and rollout of a client-facing data collection tool, scoping requirements with stakeholders and designing the solution in Google Sheets using VBA macros, dynamic dropdowns, and automated validation. Coordinated testing, refinement, and rollout readiness to ensure successful deployment.
- Authored detailed process, training, governance, and user documentation with screenshots to support adoption and long-term platform use.
- Supported the marketing team in researching and compiling SEO keywords for social media content, and identified keywords to inform cold email templates introducing Green the Chain to prospective companies.
- Managed communications between the internal team and CEO throughout the project, ensuring alignment on requirements and resolving data-related issues, with documentation and handover complete enough to ensure continuity after the internship concluded.

McDonald's

Crew Member

Waitara, NSW · Jun 2024 - Jan 2025

- Maintained compliance with operational and hygiene standards in a fast-paced team setting, contributing to smooth service delivery across shifts.

PROJECTS

Student Outcomes Analysis - Capstone Project

- As part of a group capstone, analysed two real Macquarie University datasets, 284,818 enrolment records and 52,434 retention records, to identify student retention risk factors across faculties, cohorts, and academic performance indicators.
- Built the institutional executive dashboard in Qlik Sense tracking retention, completion, and academic performance across faculties, and contributed to the predictive modelling insights and final strategic recommendations, supporting an XGBoost model that captured 66% of projected attrition by targeting the top 20% highest-risk students. Achieved a Distinction. Qlik Sense self-taught during the project.

Consumer Segmentation & Market Analysis

- Applied Python (K-means++ and agglomerative clustering) to segment 2,000 gym members across demographic and socioeconomic variables, identifying three distinct customer profiles, Youthful Economically-Conscious Individuals, Wealthy Metropolitan Executives, and Knowledgeable Suburban Adults, with results validated across both methods.
- Translated cluster findings into segment-specific marketing recommendations, including low-cost digital memberships for early-career members, premium wellness programmes for high-income executives, and family and corporate packages for suburban mid-career adults.

Relational Database Design

- Designed a nine-entity relational database for a Paris Olympics logistics scenario, mapping many-to-many and one-to-many relationships, defining composite primary keys and foreign keys, and writing SQL queries to retrieve and validate data across hotel, team, sport, and equipment tables.

EXTRACURRICULAR

Women Entering Business (WEB), Macquarie University

Feb 2025 - Jul 2025

Events Director

- Managed end-to-end coordination of 3–4 professional campus events - developing project plans, managing timelines and budgets, liaising with corporate sponsors including Macquarie Group, and delivering all events on time and within scope.
- Served as the primary point of contact for panel guests, speakers, and stakeholders across all events, managing logistics, tracking actions, and ensuring a high standard of delivery reflected in consistently positive post-event survey feedback.

Climate Action Week Sydney

Feb 2025 - Apr 2025

Event Management Volunteer

- Solely managed the end-to-end publishing of 200+ event listings on Humanitix within required timeframes, proactively identifying and resolving data errors to maintain accuracy across a city-wide Sydney event - reducing administrative workload on the core team.
- Recognised by senior organisational staff for initiative and cross-team support, contributing to smooth event rollout across multiple Sydney locations in a large-scale professional environment.
